Nedisha Group – Adding value to your creations

Mr. Dilpreet Singh Makker, Proprietor

At **NEDISHA GROUP** We provide/supplies of prevailing technological and innovative equipment and tools for Wood finishing and solution provider for Wooden Furniture and Door industries. We remain committed and passionate about providing uncompromising solutions for specific Wood finishing applications with a fruitful cumulative experience of 10+ years in this industry.

At Nedisha Group, We believe in adding value to your creations by developing the best in class technologies for wood finishing. We have a proven track record in a whole range of products including complete automatic or

robotized spraying lines, flat dryers, vertical dryers, UV and UV led curing systems, complete roller coating and curtain coating lines, printing machines and robots and 3D lines for doors, window frames and three-dimensional panels.

Nedisha Group provides a professional team from the design stages to after-sales technical assistance. Inside our Technology Centre we develop the best technologies for wood finishing to meet the high production demand, expanding solutions. Notably, to underline our innovative UV and UV led curing systems for graphic arts

A glance at few of our products:

Reciprocating Spray Painting Machine

Spraying is by far the most frequently used application when it comes to Substrate painting. Airless paint sprayers are now the most used tool in a workman’s arsenal, so selecting the correct machine will help to improve productivity and profits. Superior quality is achieved from the high number of guns and rotational speed which guarantee uniform application even in the most critical situations. The automatic change of filters prevents production cycle interruption and reduces maintenance operations

Automatic Five Axis Spraying Machine

This Machine is very flexible to work with various products painting requirements and can be easily setup on touch screen programming. These Machines remain in high demand not only due to their reliability, but also because they are intelligently configured. The Five Axis Spraying Gun is designed specifically to deliver best-in-class performance while saving you time as it is co-operated with automatic rotate and turn over working table that spraying each side of work piece (substrate) is done

uniformly with very high quality. In fact 15-18 minutes of laborious work is reduced to 3 minutes by this machine. You will experience faster clean up, faster changeovers, and faster cycle times, all packed into the lightest spray gun in the world. DOUBLE

Double Roller Coating Machine

The series of Double Roller coating machines allows a quick and economical painting of the product (Substrate) to be carried out. These systems can only be used for the finishing of flat panels and they have a rapid production cycles (approx. 8 metre/minute); they are equipped with a lacquer recovery system that allows to have no waste of product. According to different coating thickness demands, you can choose single, double, three or special roller structure. choose single, double,
