ABOUT US

Nedisha Group came into existence with the vision and mission to get innovative products and technologies for increased profitability. It is bringing in a quiet revolution in the doors, wood and furniture industries in India by getting the latest and best from around the world. The idea is to streamline production processes decrease manufacturing time even while giving value added products and most importantly, increasing profitability for the manufacturer. They are bringing customized solutions that would suit any need, any budget latest and best from around the world. The idea is to streamline production processes, decrease manufacturing time even while giving value added products and most importantly, increasing profitability for the manufacturer. They are bringing customized solutions that would suit any need, any budget.

Founder has an experience of machines, more than two decades in the doors and panel industry. And now, they are bringing their passion, knowledge, in- depth perspective to the next level to fortify the Indian doors and furniture industries with the latest global technologies and innovations.

we are dedicated towards bringing the best and latest of technologies and processes from around the world to India . The aim is to streamline manufacturing, bringing down costs and adding value to the end product. Our products are best suited for the wood, doors and furniture industry.

Mission

To constantly evolve by training self and the industry in new technologies and processes. Upgrading skills to make the industry less labour intensive and time consuming, offer ease of work, optimal utilization of resources

Vision

To serve the Indian surface finishing industry by bringing in global leaders that offers the

latest technologies.

In our initial days we have already tied up with global giant like PAMA MACHINES for UV Coatings, Profile Sander and HESSAN for PUR Lamination Machines.

Working aggressively to explore the market and wish to collaborate with many more big names to expand their business and try to cover every core of wooden industries.

Products

Panel, Cabinet, Furniture Door, Honeycomb & Foam Board Sticking Etc.

MATERIAL:

Panel - particle board, mdf, plywood, pvc board, gypsum board, pvc foam board etc.

PUR LAMINATION MACHINE:

This Machine Line Is For Pure Hot Melt Glue Which Is For The Lamination Of Various Kind Of Material. It Is Especially Good For The Lamination Of High Gloss Material,

COVER MATERIAL:

Petg, pvc, paper, hpl, cpl, acrylic etc.

This line contains: Dust collector-conveyor-automatic machine-ir tunnel-six lamp uv ring-conveyor

AUTOMATIC UV SPRAY LINE:

This automatic spray line machine is suitable for plate type furniture, solid wood doors, cabinet doors, handicraft, decorative panels and other plate type work pieces. High volume continuous spraying for coatings, Such as UV, PU, NC AC and water based paints. The gun holder is a two way, two-group approach that allows you to spray at every angle of the workpiece.

Application: - Molding, Door, Photo Frame

Application: - Solid Color door, Wood Grain door

UV ROLLER COATER LINE:

UV roller coater line:-this automatic spray line machine is suitable for plate type furniture, solid wood doors, cabinet doors, handicraft, decorative panels and other plate type work pieces. Suitable for large - volume continuous roll coating products. UV coating can be online drying, processing speed. The coating effect is stable.

This line contains: Dust collector-putty filling machine-conveyor-double UV lamp-reverse roller coater-IR tunnel- three lamp UV-conveyor.

DOUBLE LAMP UV DRYER

IR TUNNEL FOR LEVELLING

It is widely apply to the board with primer, pe, pu, uv coat- ing because of its good polishing effect.

SANDING MACHINE:

Automatic wood brush sanding machine is mainly for the grinding or sanding of carved material like door, cabinet plywood, mdf & other panel furniture or solid wood furniture.

WIDE BELT SANDER:

It is suitable for calibrating & fine sanding plywood, board, laminate lumber, composite board, particle board, solid wood, panel furniture, bamboo floor, wood floor etc.

MINI SANDER WITH 3 ROLLERS:

This machine is mainly used for sanding manually on furniture, door, and panel & plywood.

PETG FILM

PETG MDF BOARD

PETG:

Petg film use pur flat laminating equipment to laminated onto different type of flat plates including: mdf board, plywood board, particle board, wood

board, aluminium honeycomb board, pvc foam board & other flat place.

Petg film have many advantages: color stable, high hardness, wear resistant, anti – scratch, anti-fingerprint, eco-friendly, heat resistance, resistance pollution & burning resistance. It is available in matt, super matt, high gloss & all rich colors.

AIR HAND SANDING TOOL:

Hand tools are meant for profile surface where most of the people do the raw sanding and paint sealer sanding manually, which give hassle & time taken to complete the job. These profile hand tools

are hassle free as it is pneumatic power machine so no electrical motor is fitted and its drive only with airpower; therefore, it's almost maintenance free equipment.

WOOD NATURAL OIL:

The Oil is based on a long and proud tradition of finishing wood in soft and natural way without harming our mutual environment. All our raw materials are sourced in Europe and comply with the European Reach Regulation. This Oil gives both the beauty of the wood grain and gives you two times the thickness of a single coat of polyurethane.

PAPER LAMINATION MACHINE-

Paper lamination machine is used to stick the paper on MDF, Plywood, Particle board Door.
